

Healed of Deafness in One Ear after 26 Years

Mrs. Mollie Hudson of 446 63rd Street, Chicago, said: " I have been attending the meetings of Dr. Dowie for the last six or seven weeks. When I came here I was deaf in one ear. At the age of fourteen I had typhoid fever, which left me deaf, but when I first came to the healing room I did not speak of my deafness, as I had other troubles. One evening Dr. Dowie said some of us got our healing on the installment plan, taking five cents worth or ten cents worth, and I thought I was taking mine on the same plan. I spoke to him that evening of my deafness, and the next evening the deafness left me. When I came here I had to go up in front, because I could not hear what was said, and last Thursday I sat in the back part of the house at the Children's meeting when Mrs. Dowie spoke, and she speaks in a lower tone than the Doctor, and I heard every word that was said distinctly. I am now forty and was fourteen years of age when I became deaf; twenty-six years in all,"

Dr. Dowie then asked her to turn her back to him, and in a moderate voice repeated a few sentences, which she readily heard.
